

Cloud Study Jams Info Session Event Report

The Cloud Study Jams Info Session was held on the **23rd of September 2023** at 8:00 PM in an online mode. The event aimed to provide information about the **Cloud Study Jams (CSJ)** program to interested participants. We were pleased to receive an overwhelming response from the community, with a total of **160 registrations** for the event. However, due to limitations in the online meeting platform's capacity, only the first 100 registrants could be accommodated in the virtual meeting room. The session began with a warm welcome and an introduction by our GDSC lead Adarsh Varghese Manu, setting the tone for the proceedings. **Feba Jose**, the Cloud Facilitator, took the stage to introduce the Cloud Study Jams program to the attendees. She provided insights into the program's objectives, benefits, and the opportunities it offers to participants. Following the program overview, Feba also presented a step-by-step guide on how attendees could register for the CSJ program. This ensured that participants had a clear understanding of the registration process and could easily get involved.

The event concluded with a vibrant and interactive Question and Answer (Q&A) session, where attendees had the chance to ask their queries about the Cloud Study Jams program. The Q&A session lasted for approximately 15 minutes and covered a range of questions related to the program. To ensure that those who couldn't attend the live session could access the valuable information shared, we promptly shared the recording of the session and the registration link with the broader community. This way, anyone interested in the CSJ program could benefit from the insights and guidance provided during the event.
