CyberVerse Event Report

On the **16th of September 2023**, the highly anticipated cybersecurity event, GDSC's Cyberverse, unfolded with a virtual gathering hosted on Google Meet. The event, aptly named Cyberverse, underscored the paramount importance of safeguarding personal data and details in today's digital age.

Commencing at 4 pm and concluding at 5:30 pm, the event featured **Geo Mathew Joseph** as the keynote speaker. As a core team member of GDSC and a cybersecurity analyst, Geo brought forth a wealth of in-depth knowledge in the field of cybersecurity. The audience was treated to an enlightening introduction session that delved into the fundamental concepts of cybersecurity

Geo covered a spectrum of crucial topics, including **mobile security, cloud security, and operational security**, offering valuable insights and practical measures to fortify data protection. His expertise and engaging presentation style captivated the audience, making the session both informative and thought-provoking.

The coordination of the event was expertly managed by **S Suraj**, serving as the Cybersecurity Lead, **Kevin Shaji** the Cybersecurity Advisor, along with **Arjun KH**, **Sreedev** and **Abhiram** played a crucial role as a supportive hand in ensuring the seamless execution of Cyberverse.

Following the insightful presentation, the floor was opened for a brief yet enriching question-and-answer session. Geo Mathew Joseph fielded diverse and interesting questions from the audience, providing thoughtful and relevant answers.
