

# GOKART GIVEAWAY WORKSHOP

*IEEE SB MCE*

*“The purpose of education is to replace an empty mind with an open one”*

We live in an age of innovation, a practical education must prepare a man for work that does not yet exist and remains unique. **IEEE SB MCE** provided an opportunity for students of various colleges to innovate their ideas by conducting a workshop about **Go-Kart**.

On **13th and 14th January 2018** Marian Engineering College conducted a workshop on Go-kart build and give away session, motorized luggage cart develop and build section, performance tuning section in association with **SPADE AUTOSPORTS**.

DATE	13 <sup>TH</sup> & 14 <sup>TH</sup> January
VENUE	Marian Engineering College
TIME	8:30AM – 5:00PM
NO. OF PARTICIPANTS	218

# DAY - I

The registration process commenced by 8:30 am. Students were divided into two groups consisting of 14 teams and each include 10 to 15 students. The first group was sent to IEDC Conference hall for their first section and the others groups was taken to Mechanical block seminar hall.

The morning session of the workshop started at 9:30am. The session was taken by **Akhil Suresh** and **Avinash**. The classes' began by giving an introduction about Go-kart later the session became more interactive by sharing various experiences of tutors.

The session was halted for 30 minutes for tea break from 11:00am. The next session started at 11:30 at College Auditorium and was handled by **Syed Ali Nazimuddin (CEO, SPADE AUTOSPORTS)**. Lunch break was from 1:00 pm and next session was continued thereafter where students got an opportunity to know more about machinery parts of a 2-wheeler and its functions. The session continued till 4:30pm.

## DAY-II

The second day of workshop was the highlight of overall event. The classes started at 10.00am with a practical and interactive introduction.

Students were more energetic and active even before the session. They were given instructions about building go-kart. Performance tuning kit for each team was provided by Spade Autosports. Each team was given two expertise instructors.

A recreation break was provided for students at 11:00am after all construction process began. The session halted for lunch break at 12:30pm and next section continued till 5:00pm.
