

Report On GitHub Unlocked

Event Name: GitHub Unlocked

Organized By: IEEE Student Branch, Marian Engineering College

Date: 9 August 2026

Time: 8:00 PM – 9:00 PM

Mode / Platform: Online, Google Meet

Resource Person: Sreehari S J, Technical Lead, IEEE SB MCE

GitHub Unlocked was an online session organized by the IEEE Student Branch, Marian Engineering College, aimed at helping beginners get started with Git and GitHub. The session was designed for students with little to no prior exposure to version control, with the objective of building a clear understanding of how Git and GitHub work and why they are essential tools in modern software development. The session was led by **Sreehari S J**, Technical Lead, IEEE SB MCE, and saw active participation from 78 students.

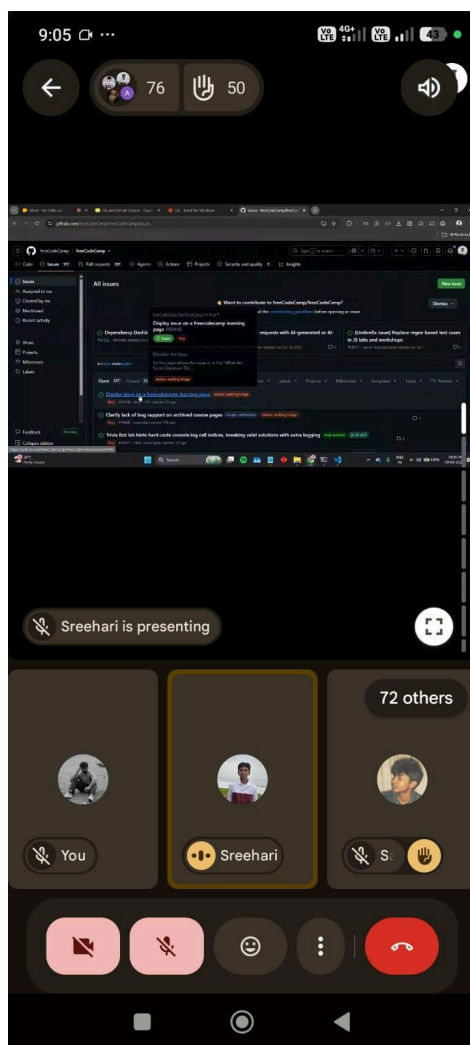

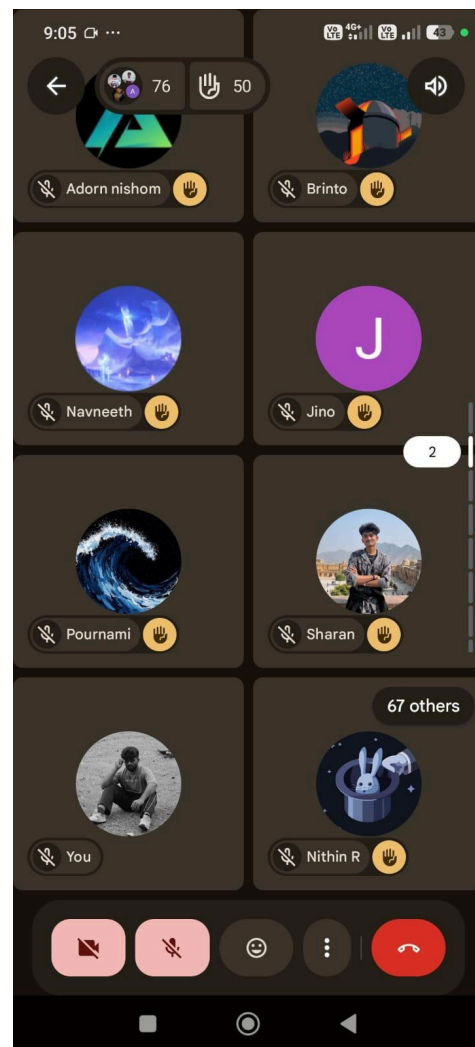

The session began with an introduction to the fundamentals of version control, where the speaker explained the core concepts of Git and GitHub, how the two are related yet distinct, and how they work together to track changes and manage code efficiently. He went on to highlight the importance of GitHub in real-world project and software development workflows, emphasizing how it enables collaboration, version tracking, and seamless teamwork among developers.

Following this, Sreehari walked participants through the installation of Git and demonstrated the basic Git commands most used in day-to-day development. Participants were guided step by step through the entire process of creating their own GitHub accounts, and setting up their first Git repository, allowing them to apply the concepts hands-on as they were being explained.

The session was highly interactive, with participants raising doubts about the issues they encountered while working with Git and GitHub in real time. The speaker addressed these queries individually, ensuring that participants were able to resolve their errors and follow along without difficulty.

The event concluded successfully with participants gaining a working understanding of Git and GitHub, along with the confidence to use these tools in their own projects. GitHub Unlocked proved to be an informative and beginner-friendly session, achieving its goal of introducing essential version control skills to the student community.
