

Hands on Gemini Report

On January 24th, a dynamic workshop titled "Hands-on Gemini" unfolded, bringing together eager participants in collaboration with GDSC SCTCE. The event, led by the esteemed **Sreedhar KS**, the Lead of GDSC SCTCE, provided attendees with a hands-on experience utilizing the Gemini Pro API, now freely accessible for development through Google's AI Studio.

The workshop commenced with a comprehensive introduction to Large Language Models (LLMs) and Generative AI, setting the stage for a deep dive into the intricacies of the Gemini Pro API. Sreedhar KS skillfully guided participants through the essentials, ensuring a solid foundation before venturing into practical applications.

The heart of the workshop revolved around the utilization of the Gemini Pro API, an invaluable tool provided by Google for fostering development in the realm of Generative AI. Attendees were actively engaged in the workshop, progressing from understanding the nuances of writing prompts to the practicalities of building and deploying solutions for development purposes.

The event not only provided a technical exploration into the world of Generative AI but also served as a platform for collaboration and skill development. The availability of the Gemini Pro API for free through Google's AI Studio opened new doors for participants to experiment, innovate, and contribute to the ever-evolving landscape of artificial intelligence.
