

Solution Challenge Info Session Report

On December 17th, **Philanta Gomez**, the Head of Operations at GDSC MCE, hosted an insightful information session to introduce students to the Solution Challenge. The event covered an array of topics, providing participants with a comprehensive understanding of the challenge, its scope, and the roadmap to successful participation.

Philanta began by elucidating the connection between the Solution Challenge and the 17 Sustainable Development Goals (SDGs), emphasizing the impactful role technology plays in addressing global challenges. The session not only outlined the broader context but also delved into the specifics of the challenge, setting the stage for an engaging and purposeful learning experience.

Throughout the info session, participants gained insights into the timeline and guidelines of the Solution Challenge. Philanta meticulously navigated through key milestones, ensuring that attendees were well-informed about the deadlines and expectations. This clarity proved instrumental in empowering students to approach the challenge with a strategic mindset.

Moreover, the event fostered a collaborative atmosphere by disseminating crucial resources through the Community WhatsApp group. These resources were designed to aid participants in their preparation, equipping them with the necessary tools to conceptualize and develop impactful solutions for the Solution Challenge.
